

MULTI SOLUTION CAB

SUPERB VARIABILITY TO YOUR OPERATIONS

MSK VARIA – SUPERB VARIABILITY TO YOUR OPERATIONS.

MSK VARIA is a multisolution cabin for all range volumes. The cabin is designed for a vast variety of mobile and non-mobile applications – working machines and industrial solutions, like sprayers, harvesters, and material handling machines.

In MSK VARIA, we offer You our best competence of safety cabins, cost-efficient performance, consistent quality, and reliability. The VARIA cabin combines high technology, visual design, functional usability, ergonomomy, and safety.

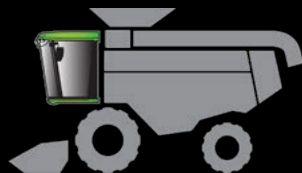

VARIA really is a multisolution cabin to the fullest – you name it, VARIA suits it.

VARIA CAT4

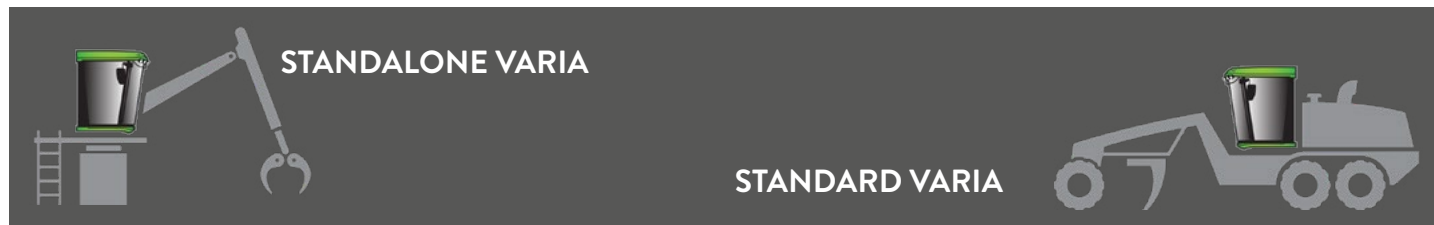

The safety and ergonomics of the end-users have always been one of our top priorities. With the new model of VARIA, the CAT4, we bring the safety of our cabins to a new level. CAT4 VARIA cabins are equipped with a filtration system of the highest protection class, category 4, and installed seamlessly to the cabin.

CAT4 VARIA cabins fulfill the highest requirements, standards, and regulations of the category 4 protection class. Category 4 ensures that harmful substances, like for example pesticides and pollutants, don't enter the cabin.

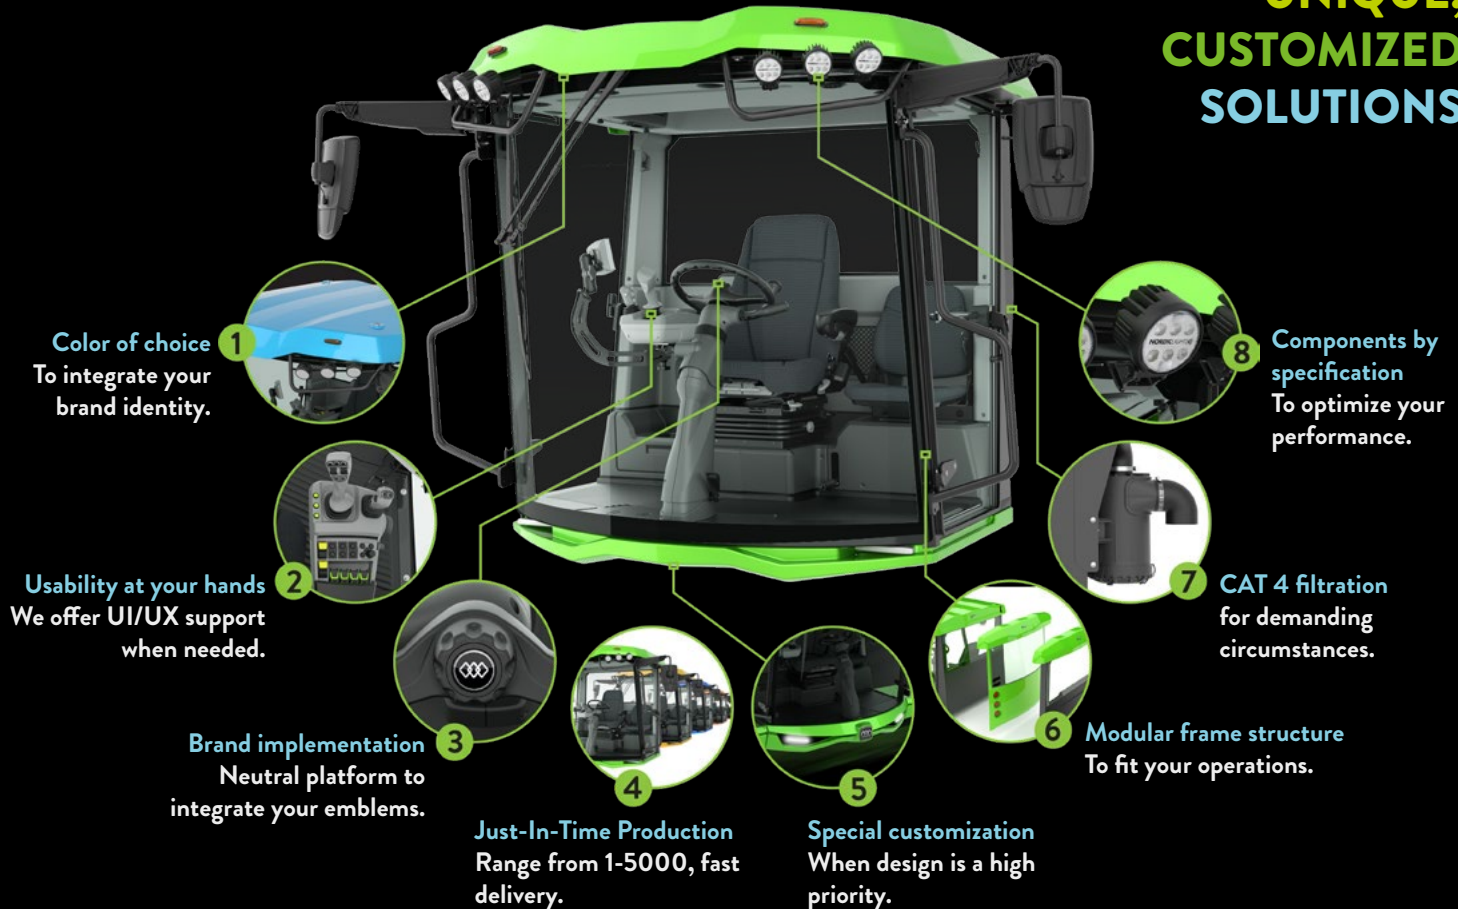

With CAT4 VARIA, future field and industry operations can be performed with the utmost safety of the user.

CAT4 VARIA cabins have been tested, and fulfill the highest requirements for EN 15695-1 : 2017: Protection of the operator against hazardous substances.
